

This project is “truly” a neighborhood project. The project was initiated by the City because of concerns from the neighborhood regarding bicycle and pedestrian safety. Several neighborhood meetings were held throughout the design phase, and a neighborhood design task force was involved in providing comments and input into the design of the improvements. In addition, several members of the design task force were invited to the project partnering session with the contractor and engineers, and the pre-construction conference. A neighborhood meeting was held July 30th so the neighborhood would be aware of the start of construction, and provide input regarding future communication throughout the construction phase. Feel free to look through the meeting notes as they may provide the answers to questions you may have regarding construction.

The project consists of bicycle and pedestrian improvements along 13th Street from Mill to Hardy.

Archon, Inc. has been selected as the contractor for this project, and will receive their notice to proceed from the City on August 11th. The project is scheduled to take 180 days.

The City Project Manager and Contractor will review the plans and contact any home owners along 13th Street whose property/landscaping may be significantly impacted to work out any details.

Future information will be available on this webpage, and information postcards/flyers will be mailed to the neighborhood about every 6-8 weeks with updated information.

A hotline has been established for information at (480) 898-4090, or you can contact the City's Project Manager for this project, Kent Clayton, at (480) 350-8415.
